## Investment Manager Comment

Generali Equity VIII recorded performance of +2.45% in February 2022. The JCI recorded a performance of +3.88% mom in February 2022, rising from the 6600 level to around 6900. The positive performance this month could be attributed to the following. Firstly, the rising commodity price is favourable to the overall Indonesian economy, as reflected in the stable exchange rate of USD/IDR 14,367. As a result, the Indonesian stock market experienced positive growth, as represented by these shares from various sectors (i.e., BBCA 3.54%, BBRI 11.79%, BMRI 6.57%, ASII 6.42%, TPIA 10.74%, BBNI 17.65%, EMTK 20.00%, UNTR 7.56%, ADRO 10.86%, SMMA 3.88%). This encouraging outlook, perhaps, had attracted foreign capital into the market. Secondly, there was a positive sentiment surrounding the market in anticipation of the release of potentially stellar performances in the 2021 company financial reports. Thus, these two factors may have contributed to the growth in the stock market.

## Investment Manager Comment

Generali Fixed Income VIII recorded performance of +0.36% in February 2022. In February, the 5-year government bond yield rose slightly from 5.299% to 5.406% and the 10-year yield from 6.538% to 6.607%. The fixed income market in general moved sideways this month. As the FED tapering deadline approaches, the Indonesian yields slowly creep up in anticipation of the FED rate hike and the rising inflation. Thus, market participants continue to take a "wait-and-see" approach. Besides, the rising commodity prices probably made the stock market more attractive than the fixed income market. In the meantime, BI still maintained its rates at 3.5% and the exchange rate was stable at around USD/IDR 14,367.
