Market Commentary

DPLK Generali Equity Bravo recorded performance of -2.40% in May 2022. The JCI recorded a performance of -1.11% mom in May 2022, dropping to around 6500 in the first half, and rising to around 7100 in the second half. The volatile performance this month could be attributed to the following. Firstly, some investors might have been profit-taking by selling overvalued shares after the holidays. As a result, the decline of overvalued shares (digital-bank-related shares like EMTK, ARTO, BBHI) might have dragged down other shares in the Finance (e.g., BBRI, BBCA, BMRI) and Technology (e.g., BUKA, DCII) sectors. Secondly, the FED rate hike in May, with additional expected hikes in the coming months, might have made investors more reserved and concerned about a future correction. Thus, these two negative factors and other positive economic recovery aspects might have contributed to the stock market movement this month, as represented by the following shares (e.g., BYAN +26.53%, BBCA -4.62%, GOTO +11.76%, EMTK -35.95%, UNVR +21.59%, BBRI -4.93%, BBHI -32.31%, TLKM -6.71%, ARTO -19.53%, BMRI -5.03%).

Market Commentary

DPLK Generali Fixed Income Bravo recorded performance of +0.35% in May 2022. In May, the 5-year government bond yield decreased from 6.315% to 6.161%, but the 10-year yield rose slightly from 6.998% to 7.047%. To combat the high US inflation, the FED had hiked its rates by 50 bps in May, and committed to raising its rates another 50 bps in both June and July. The FED also plans to reduce its balance sheet by USD 95 Bn by August 2022. The news might have made investors concerned about a stock market correction in the near future, and made short-term fixed income more attractive temporarily. Thus, bond prices rose slightly this month. Nevertheless, BI still maintained its rates at 3.5% and the exchange rate weakened to around USD/IDR 14,580.

Market Commentary

DPLK Generali Money Market Bravo recorded performance of +0.26% in May 2022. The BI Board of Governors Meeting agreed on 23th and 24th May 2022 to hold the BI 7-Day Reverse Repo Rate at 3.50%, while also maintaining the Deposit Facility (DF) rates at 2.75% and Lending Facility (LF) rates at 4.25%. The decision is consistent with the need to manage inflation and maintain exchange rate stability, while continuing to foster economic growth amid escalating external pressures stemming from the geopolitical tensions between Russia and Ukraine as well as faster monetary policy normalisation in several advanced and developing economies.
