Market Commentary

DPLK Generali Equity Bravo recorded a performance of -13.93% in February 2025. The JCI recorded a performance of -11.80% in February 2025, as dropping from 7100 level the 6300 level. The Indonesian stock market was volatile this month, influenced by both domestic and international factors. Firstly, the launch of Indonesia's sovereign wealth fund Danantara was not well received as it raised concerns about corruption and mismanagement. Secondly, the new US tariff policies on China, Mexico, Canada, and the EU had caused global economic uncertainty, leading to massive sell-offs in EM investments like Indonesia. Lastly, the Rupiah had weakened significantly (IDR/USD 16,585 in Feb25 vs. 16,344 in Jan25), requiring central bank intervention and becoming one of the worst-performing EM currencies. All these factors contributed to reduced investor confidence and the capital flight away from the Indonesian stock market (foreign net sell of about IDR 18.19 trillion mtd), despite its good fundamentals, such as its high foreign exchange reserve levels (USD 154.5 billion in Feb) and GDP growth rate (5.02% YoY in 4Q24). Nonetheless, the following large-cap stocks drove the stock market movement this month (e.g., BBKA -10.85%, BREN -32.13%, BYAN -5.63%, TPIA -5.63%, BBRI -20.38%, AMMN -12.96%, BMRI -23.65%, DSSA -31.31%, TLKM -11.65%, DCII +149.73%).

Market Commentary

DPLK Generali Fixed Income Bravo recorded performance of +1.43% in February 2025. In January 2025, the 5-year Indonesian government bond yield fell from 6.821% to 6.749%, while the 10-year yield decreased from 7.102% to 7.039%. The Federal Reserve (FED) retained its benchmark interest rate at 4.25%-4.5% in February 2025 due to economic uncertainty, inflation control and financial stability reasons. The Indonesian market faced economic turmoil due to the US trade war, but there were new government initiatives and central bank policies aimed to support the domestic bond market, fostering growth and strengthening investor confidence. These factors might have encouraged investment into safer assets and attracted foreign capital into the domestic bond market (foreign net buy of about IDR 9.85 trillion mtd). Meanwhile, the BI maintained an interest rate of 5.75% to maintain low inflation, maintain exchange rate stability, and stimulate economic growth amidst a high uncertainty environment.

*Bank Indonesia Deposit Rate Avg 1 Month

(Benchmark before Feb 2023: Average 1 Month Deposit of Bank Mandiri, Deutsche Bank and ANZ)

Market Commentary

DPLK Generali Money Market Bravo recorded performance of +0.40% in February 2025. The Bank Indonesia Board of Governors agreed on 18-19th February 2025 to hold the BI-Rate at 5.75%, while also maintaining the Deposit Facility (DF) rate and Lending Facility (LF) rate at 5.00% and 6.50%, respectively. The decision is consistent with efforts to maintain inflation in 2025 and 2026 within the 2.5±1% target corridor, stabilise the rupiah exchange rate in line with economic fundamentals against a backdrop of persistently high global uncertainty and drive economic growth. Moving forward, Bank Indonesia will continue monitoring inflation and the economic growth outlook in terms of considering further room for monetary easing based on Rupiah exchange rate movements. Meanwhile, Bank Indonesia is maintaining pro-growth macroprudential and payment system policies to foster sustainable economic growth.
