Market Commentary

DPLK Generali Equity Bravo recorded a performance of +2.16% in March 2025. The JCI recorded a performance of +3.83% in March 2025, as rising from the 6300 level to 6500 level. The high stock market volatility was influenced by both domestic and international factors. Domestically, the stock market strengthened due to positive sentiment generated from the dividend distribution season of several major bank stocks and dispelling the rumors of corruption and poor management at the Danantara Sovereign Wealth Fund's administration. Internationally, global trade tensions, particularly the imposition of new U.S. tariffs on commodities, negatively affected Indonesian exports and increased domestic market volatility. As a result, the Rupiah exchange rate had weakened (IDR/USD 16,660 on Mar25 vs. 16,531 on Feb25) and triggered a capital flight away from the Indonesian stock market (foreign net-sell of Rp.8.02 trillion mtd). However, the Eid al-Fitr holiday period shielded the domestic stock market from the negative effects of the major global events, resulting in a relatively positive performance by the end of the month. Nonetheless, the following large-cap stocks drove the stock market movement this month (e.g., BBKA +0.89%, BREN -10.20%, BYAN +3.89%, TPIA +7.46%, BBRI +20.54%, BMRI +13.04%, DCII +44.63%, AMMN -17.94%, DSSA +37.98%, TLKM +2.55%).

*45% Infovesta Govt Bond Index plus 45% Infovesta Corp Bonds Index plus 10% 1-Month Jakarta Interbank Offered Rate (JIBOR) - net, since November 2018

Market Commentary

DPLK Generali Fixed Income Bravo recorded performance of -0.36% in March 2025. In March 2025, the 5-year Indonesian government bond yield fell from 6.749% to 6.762%, while the 10-year yield decreased from 7.039% to 6.964%. The Federal Reserve (FED) maintained its benchmark interest rate at 4.25%-4.5% in March 2025 to control inflation and reduce economic uncertainty. The Indonesian bond markets experienced notable fluctuations this month, influenced by economic policies, geopolitical events, and investor sentiment. The Rupiah faced depreciation pressures due to persistent capital outflows, driven by global economic uncertainties of the US trade war and thus required central bank intervention (additional purchase of Rp.150 trillion from secondary bond market) aimed to maintain stability and ensure sufficient market liquidity. Regardless, Indonesia's prudent fiscal policies and proactive interventions by Bank Indonesia remained supportive to the economy. The BI-rate was held at 5.75% to maintain the low inflation target, maintain exchange rate stability, and stimulate economic growth amidst a high uncertainty environment.

*Bank Indonesia Deposit Rate Avg 1 Month

(Benchmark before Feb 2023: Average 1 Month Deposit of Bank Mandiri, Deutsche Bank and ANZ)

Market Commentary

DPLK Generali Money Market Bravo recorded performance of +0.37% in March 2025. The Bank Indonesia Board of Governors agreed on 18-19th March 2025 to hold the BI-Rate at 5.75%, while also maintaining the Deposit Facility (DF) rate and Lending Facility (LF) rate at 5.00% and 6.50%, respectively. The decision is consistent with efforts to maintain inflation in 2025 and 2026 within the 2.5±1% target corridor, to maintain the rupiah exchange rate stability in line with economic fundamentals against a backdrop of persistently high global uncertainty and drive economic growth. Moving forward, Bank Indonesia will continue monitoring inflation and the economic growth outlook in terms of considering further room for monetary easing based on Rupiah exchange rate movements. Meanwhile, Bank Indonesia is maintaining pro-growth macroprudential and payment system policies to foster sustainable economic growth.
