Market Commentary

Generali Equity Growth recorded a performance of +6.27% in April 2025. The JCI recorded a performance of +3.93% in April 2025, as rising from the 6500 level to 6700 level. Despite the adverse global environment, the stock market displayed resilience, as evidenced by the following factors. Firstly, first-quarter corporate earnings were released, and numerous large-cap stocks performed well, with mixed but relatively good earnings outcomes. Secondly, despite persisting trade concerns between China and the United States, there was a positive sentiment generated in part by a temporary easing of US tariff threats. Furthermore, Indonesia remained strategic by managing its relations with China and the United States amidst trade war tensions to reduce the negative consequences. Lastly, Indonesian equities outperformed several regional peers in April, boosted by domestic economic stability and investor confidence. These factors showed Indonesia remained supportive of growth, as evidenced by its fundamentals like the rising consumer confidence (121.7 in Apr25 vs 121.1 Mar25), manageable Inflation rate of 1.95% (within central bank target range of 1.5% to 3.5%), and slightly strengthened Rupiah exchange rate (IDR/USD 16,550 on Apr25 vs. 16,650 on Mar25). Nonetheless, the following large-cap stocks drove the stock market movement this month (e.g., AMMN +32.56%, BREN +9.55%, BBKA +3.82%, TPIA +9.38%, BRIS +21.79%, PANI +13.50%, TLKM +9.54%, UNVR +35.57%, DSSA +6.81%, ANTM +32.72%).
