Market Commentary

DPLK Generali Equity Bravo recorded a performance of +6.93% in May 2025. The JCI recorded a performance of +6.04% in May 2025, rising from the 6700 level to the 7200 level. Both domestic and international factors contributed to the Indonesian stock market rebound. Firstly, the US-China trade deal had eased global tensions, boosting emerging market sentiment, including Indonesia. Secondly, Bank Indonesia (BI) cut interest rates, improving liquidity, supporting equities, and fostering greater market stability over the medium term. Thirdly, clarity around the Danantara Sovereign Wealth Fund's operations and rising government spending had improved investor confidence and supported a shift in investor preference towards equities over bonds. Although the market remained sensitive to foreign capital movements, the Indonesian economy was still supportive of growth (JCI +14.4% in the last 3 months) and had attracted foreign investor interest (IDR 5.53 trillion net buy in May25). In addition, Indonesian fundamentals remained strong, such as a foreign exchange reserve surplus (USD 152.5 billion in May25), a lower inflation rate (1.60% in May25 vs. 1.95% in Apr25), and a strengthening Rupiah (IDR/USD 16,370 on May25 vs. 16,550 on Apr25). Nonetheless, the following large-cap stocks drove the stock market movement this month (e.g., BBKA +6.52%, BREN +7.88%, TPIA +18.41%, BBRI +15.58%, BMRI +8.38%, DSSA +18.68%, TLKM +6.82%, ASII +1.04%, BBNi +7.42%).

Market Commentary

DPLK Generali Fixed Income Bravo recorded performance of +0.44% in May 2025. In May 2025, the 5-year Indonesian government bond yield fell from 6.651% to 6.423%, while the 10-year yield moved sideways from 6.827% to 6.821%. The global bond market was influenced by growth concerns and tariff uncertainties. The US Federal Reserve (FED) remained cautious in May and held interest rates at the 4.25% to 4.5% range to maintain inflation at the 2% target, despite fears of monetary easing and high inflation. Yield curves in major G7 economies steepened as markets anticipated further easing. Meanwhile, the Indonesian 10-year yield stayed relatively stable despite the rising UST yields. Despite global uncertainties, Indonesia's bond market remained resilient, supported by the Rupiah that appreciated against the USD, active government bond auctions, fiscal prudence, and accommodative monetary policy. As such, domestic bonds became attractive to foreign investors (IDR 24.09 trillion net buy in May25).

(Benchmark before Feb 2023: Average 1 Month Deposit of Bank Mandiri, Deutsche Bank and ANZ)

Market Commentary

DPLK Generali Money Market Bravo recorded performance of +0.42% in May 2025. The Bank Indonesia Board of Governors decided on 20th-21st May 2025 to lower the BI-Rate by 25bps to 5.50%, while also lowering the Deposit Facility (DF) rate by 25bps to 4.75% and the Lending Facility (LF) rate by 25bps to 6.25%. The decision is consistent with low and controlled inflation projected in 2025 and 2026 within the 2.5±1% target corridor, along with efforts to maintain rupiah exchange rate stability in line with economic fundamentals and drive economic growth. Moving forward, Bank Indonesia will continue orienting monetary policy towards maintaining inflation within the target corridor and rupiah exchange rate stability in line with economic fundamentals, while considering further room to nurture economic growth based on global and domestic economic dynamics. Meanwhile, Bank Indonesia continues optimising accommodative macroprudential policy to foster sustainable economic growth, using various strategies to revive credit growth and enhance liquidity management flexibility in the banking industry.
