Market Commentary

Generali Equity Index recorded a performance of -10.32% in March 2026. The Indonesian stock market in March 2026 further solidified its strategic transition phase, as investors focused more on corporate fundamentals with the full release of 2025 annual reports and Q1 2026 earnings previews. Market activity showed continued selective buying in banking and consumer staples stocks—supported by high dividends and stable earnings—which offset declines in technology and cyclical sectors. The steady BI-Rate at 4.75% and controlled inflation kept risk assets attractive, viewing remaining profit-taking as normal adjustments by institutional investors. With increasing foreign capital inflows and stable macroeconomics, the market demonstrated strong resilience, indicating this volatility is a normalization stage to support long-term growth trends.
