Market Commentary

DPLK Generali Fixed Income Bravo recorded a performance of 0.36% in April 2026. Indonesia's fixed income market in April 2026 emerged as a pocket of resilience amid broader capital market turbulence. The ICBI rose 0.74% month-on-month to 436.38, supported by a 3.9 bps average decline in government bond (SBN) yields—even as the 10-year yield remained elevated near 6.61–6.83% year-to-date on lingering global pressures and rupiah weakness. Foreign investors recorded net buying in the SBN market of IDR 8.8 trillion throughout April, signaling continued confidence in sovereign debt instruments as equities sold off. Domestic investor ownership strengthened to 59.30%, reinforcing a key structural buffer for bond market stability. The stark positive divergence between bonds and equities reaffirmed fixed income's role as the preferred defensive instrument amid April 2026's global uncertainty.
