Market Commentary

Generali Equity Concept Thematic recorded a performance of -6.71% in September 2026. Indonesia's stock market reversed sharply in September 2026, snapping its two-month recovery as the JCI tumbled 6.96% month-on-month to close at 6,071.14, extending the year-to-date decline to roughly 29.8%, the worst nine-month performance among major global indices. The slide was driven by escalating geopolitical tensions and rising global interest rates, compounded mid-month by a 1.69% single-day drop tied to foreign fund rebalancing after Vietnam's upgrade to emerging-market status. Foreign investors turned net sellers, posting Rp10.24 trillion in outflows, a sharp reversal from August's inflows. Selected names still drew foreign accumulation, led by ANTM, AADI, and BBRI.
